

Body Blueprint® Elite Plus+ Guide

Elite Plus+ Guide: Introduction & Framework

Who This Is For

Elite Plus+ is built for high performers, biohackers, and transformation-driven individuals who want to master their metabolism, optimize hormonal health, and achieve sustainable peak condition. You’ve likely completed the Intermediary tier or already have a strong foundation in training, nutrition, and recovery.

What You’ll Achieve

- **Visible body recomposition:** Lean mass gain, fat loss, and metabolic flexibility
- **Hormonal optimization:** Testosterone, growth hormone, insulin sensitivity, and thyroid support
- **Cognitive resilience:** Enhanced focus, mood stability, and sleep architecture
- **Digestive and inflammatory control:** Microbiome diversity, gut lining integrity, and systemic repair
- **Sustainable rhythm:** Weekly anchors, batch prep mastery, and frictionless execution

Core Pillars

Elite Plus+ is built on five interlocking modules:

Module	Focus Area	Outcome
1. Metabolic Precision	Macronutrient cycling, insulin control, nutrient timing	Fat loss + lean mass gain
2. Hormonal Resilience	Testosterone, thyroid, cortisol, growth hormone	Energy + recovery + libido
3. Cognitive & Sleep Architecture	Neurotransmitters, circadian rhythm, sleep depth	Focus + mood + repair
4. Gut & Inflammation Control	Microbiome, anti-inflammatory foods, digestive ease	Bloat-free digestion + immune support
5. Execution Mastery	Batch prep, rhythm anchors,	Consistency + sustainability

	frictionless delivery	
--	--------------------------	--

◆ How to Use This Guide

- **Modular Format:** Each module is standalone but synergistic. You can start anywhere.
- **Actionable Steps:** Every section ends with clear, stepwise implementation.
- **Visuals & Trackers:** Integrated throughout for clarity and habit reinforcement.
- **Cookbook Integration:** Recipes are tagged by module and function — you’ll see “Functional Tag” on each.
- **Secure Delivery:** This guide is optimized for token-based access and print-ready formatting.

◆ Elite Mindset

This tier isn’t about restriction — it’s about precision. You’ll learn to eat more strategically, recover more deeply, and train with purpose. You’ll build a body that performs, not just looks good.

🔥 Module 1: Metabolic Precision

🎯 Objective

To strategically manipulate macronutrients and meal timing to:

- Maximize fat oxidation and lean mass retention
- Improve insulin sensitivity and glucose control
- Enhance energy availability and recovery windows
- Support hormonal balance (testosterone, thyroid, growth hormone)

◆ Core Concepts

1. Macronutrient Cycling

You’ll rotate your intake of carbs, fats, and protein based on training intensity and time of day.

Day Type	Carbs	Fats	Protein	Purpose
Training Day	Moderate–High	Low–Moderate	High	Glycogen replenishment + muscle growth
Rest Day	Low	Moderate–High	High	Fat oxidation + hormonal reset

2. Nutrient Timing Windows

- **Pre-Training (60–90 min before):**
 - Lean protein + slow carbs (e.g., eggs + sweet potato)
 - Optional caffeine or adaptogens
- **Post-Training (within 60 min):**
 - Fast carbs + lean protein (e.g., rice + chicken)
 - Avoid fats to maximize insulin sensitivity
- **Evening (Recovery Focus):**
 - Protein + healthy fats + low glycemic veggies
 - Supports growth hormone, sleep, and blood sugar stability

3. Metabolic Anchors

- **First Meal:** Protein-dominant to blunt glucose spike and set tone for the day
- **Last Meal:** Glycine-rich or fat-stabilized to support sleep and overnight repair
- **Midday:** Carb-flex based on energy output and training schedule

Elite Biomarkers to Watch

- **Fasting glucose** (target: 75–85 mg/dL)
- **Postprandial glucose** (target: <110 mg/dL at 1 hr)
- **Waist-to-height ratio** (target: <0.5)
- **Morning body temp** (thyroid proxy: 97.8–98.2°F)
- **Energy, hunger, and mood (EHM) tracking:** Daily subjective markers

Implementation Checklist

- ☐ Establish training vs rest day meal templates
- ☐ Anchor first and last meals with precision
- ☐ Use a CGM or track post-meal energy/mood for feedback
- ☐ Batch prep 2–3 metabolic anchor meals weekly
- ☐ Adjust carbs based on training volume and recovery

Module 2: Hormonal Resilience

Objective

To reinforce hormonal health through strategic inputs that:

- Elevate testosterone and growth hormone naturally
- Support thyroid output and metabolic rate

- Regulate cortisol and stress response
- Enhance libido, energy, and recovery capacity

◆ Core Concepts

1. Testosterone Optimization

- **Key nutrients:** Zinc, magnesium, vitamin D, saturated fat, cholesterol
- **Meal timing:** Protein + fat dominant meals in the evening support testosterone and GH release
- **Training synergy:** Resistance training + compound lifts + short bursts of HIIT
- **Recovery:** Deep sleep, glycine, and anti-inflammatory fats (e.g., omega-3s, ghee)

2. Thyroid Support

- **Key nutrients:** Iodine, selenium, tyrosine, iron
- **Meal rhythm:** Regular protein intake + stable blood sugar
- **Temperature tracking:** Morning body temp (target: 97.8–98.2°F)
- **Avoid suppressors:** Chronic low-carb, excessive fasting, overtraining

3. Cortisol Regulation

- **AM cortisol:** Anchored by protein-rich first meal and light exposure
- **PM cortisol:** Lowered by glycine, magnesium, and screen-free wind-down
- **Adaptogens:** Rhodiola, ashwagandha, holy basil (optional, cycle weekly)

4. Growth Hormone Release

- **Stimulated by:** Deep sleep, fasting windows, high-protein evening meals
- **Suppressed by:** Late-night carbs, alcohol, poor sleep hygiene
- **Supportive nutrients:** Arginine, glycine, glutamine, collagen peptides

🧠 Hormonal Anchors

Time	Input	Hormonal Impact
Morning	Protein + light exposure	Cortisol alignment + thyroid activation
Midday	Movement + micronutrients	Testosterone + metabolic rate

Evening	Protein + fat + glycine	GH release + cortisol suppression
---------	-------------------------	-----------------------------------

✔ Implementation Checklist

- [] Track morning body temperature for 5 days
- [] Anchor first and last meals with hormonal precision
- [] Include zinc, magnesium, and vitamin D-rich foods weekly
- [] Avoid late-night carbs and blue light exposure
- [] Integrate 2–3 resistance training sessions per week

🧠 Module 3: Cognitive & Sleep Architecture

🎯 Objective

To reinforce brain function and sleep quality through targeted inputs that:

- Support neurotransmitter synthesis (serotonin, dopamine, GABA)
- Align circadian rhythm and melatonin release
- Deepen sleep architecture (REM + slow-wave)
- Enhance focus, mood, and emotional regulation

💠 Core Concepts

1. Neurotransmitter Nutrition

- **Serotonin:** Tryptophan + B6 + magnesium (e.g., turkey, spinach, banana)
- **Dopamine:** Tyrosine + iron + vitamin C (e.g., eggs, beef, citrus)
- **GABA:** Glycine + magnesium + taurine (e.g., collagen, leafy greens, yogurt)

2. Circadian Anchors

Time	Input	Impact
Morning	Sunlight + movement + protein	Cortisol alignment + dopamine boost
Midday	Balanced meal +	Focus + serotonin

	hydration	stability
Evening	Glycine-rich meal + screen-free wind-down	Melatonin release + GH surge

3. Sleep Depth Enhancers

- **Glycine:** Collagen peptides, bone broth, gelatin
- **Magnesium:** Leafy greens, pumpkin seeds, Epsom salt baths
- **Wind-down rituals:** Blue light blockers, breathwork, journaling, no caffeine after 2 PM

4. Cognitive Recovery Foods

- **Eggs:** Choline for acetylcholine and memory
- **Fatty fish:** DHA for brain repair
- **Dark berries:** Polyphenols for neuroprotection
- **Greek yogurt:** Probiotics for gut-brain axis

Elite Sleep Metrics

- **Sleep latency:** <20 minutes
- **Sleep efficiency:** >85%
- **REM + deep sleep:** >90 minutes combined
- **Morning HRV trend:** Stable or rising
- **Subjective markers:** Wake refreshed, stable mood, no afternoon crash

Implementation Checklist

- ☐ Anchor morning with sunlight + protein
- ☐ Avoid caffeine after 2 PM
- ☐ Include glycine-rich meal or supplement before bed
- ☐ Use blue light blockers or screen-free wind-down
- ☐ Track sleep latency and morning mood for feedback

Module 4: Gut & Inflammation Control

Objective

To reinforce digestive health and reduce systemic inflammation by:
Supporting microbiome diversity and gut-brain signaling

- Repairing gut lining and reducing permeability (“leaky gut”)
- Controlling inflammatory cytokines and oxidative stress
- Enhancing nutrient absorption and immune modulation

◆ Core Concepts

1. Microbiome Diversity

- **Probiotics:** Greek yogurt, kefir, fermented cabbage, miso
- **Prebiotics:** Onion, garlic, banana, asparagus, flaxseed
- **Polyphenols:** Berries, cocoa, green tea, olive oil
- **Diversity rule:** 20+ plant types per week (track with Gut Diversity Grid)

2. Gut Lining Repair

- **Key nutrients:** Zinc, glutamine, glycine, collagen, vitamin A
- **Supportive foods:** Bone broth, collagen peptides, spinach, pumpkin seeds
- **Avoid triggers:** Excess alcohol, NSAIDs, ultra-processed oils, chronic stress

3. Inflammation Control

- **Anti-inflammatory fats:** Omega-3s (salmon, sardines), ghee, olive oil
- **Spices:** Turmeric, ginger, cinnamon, cumin
- **Blood sugar stability:** Protein-first meals, low glycemic load, avoid glucose spikes

4. Digestive Rhythm Anchors

Time	Input	Impact
Morning	Protein + probiotic	Gut-brain axis + motility activation
Midday	Fiber + polyphenols	Microbiome diversity + anti-inflammatory signaling
Evening	Glycine + magnesium	Gut lining repair + sleep synergy

Elite Gut Metrics

- **Bloat-free digestion:** No post-meal distension or discomfort
- **Regularity:** 1–2 well-formed bowel movements daily
- **Mood stability:** No afternoon crash or irritability
- **Skin clarity:** Reduced redness, breakouts, or puffiness
- **Subjective markers:** Calm gut, clear mind, stable energy

Implementation Checklist

- ☐ Track plant diversity using Gut Diversity Grid (20+ types/week)
- ☐ Include probiotic + prebiotic combo daily
- ☐ Anchor evening meal with glycine-rich protein and anti-inflammatory fats
- ☐ Avoid glucose spikes and inflammatory oils
- ☐ Batch prep 2–3 gut-supportive meals weekly

Module 5: Execution Mastery

Objective

To eliminate friction and maximize consistency by:

- Anchoring weekly rhythms and meal templates
- Leveraging batch prep for metabolic precision
- Automating delivery and access with secure systems
- Reinforcing habits through visual trackers and modular design

Core Concepts

1. Weekly Rhythm Anchors

- **Training Days:** Higher carb, lower fat, post-training glycogen support
- **Rest Days:** Lower carb, higher fat, hormonal reset
- **Evening Meals:** Glycine-rich, anti-inflammatory, sleep-supportive
- **First Meals:** Protein-dominant, blood sugar stabilizing

Use a 7-day planner to pre-assign meal types based on training schedule.

2. Batch Prep Strategy

- **Tiered Prep:**
 - 2–3 protein anchors (e.g., grilled chicken thighs, turkey bake)
 - 2–3 veggie sides (e.g., cauliflower rice, spinach sauté)

- 1–2 recovery carbs (e.g., sweet potato mash, beet mash)
- **Storage Format:**
 - Airtight containers, labeled by day and module
 - Optional: vacuum seal or freeze for extended shelf life

3. Modular Meal Templates

Each meal is tagged by function (e.g., Recovery / Hormonal Support / Gut Health). You’ll mix and match based on your daily goals.

Meal Type	Protein	Carb	Fat	Tag
Post-Training	Chicken	Rice	Minimal	Recovery / Glycogen
Evening	Eggs	Veggies	Olive oil	Sleep / Hormonal
Snack	Yogurt	Berries	Chia	Gut / Satiety

4. Secure Delivery System

- **Token-based access:** Guides and recipes delivered via secure Cloudflare Worker endpoint
- **Print-ready layout:** PDF formatting for offline use and physical reference
- **Modular organization:** Each recipe and module is standalone but interlinked

✔ Implementation Checklist

- ☐ Assign weekly rhythm using 7-day planner
- ☐ Prep 2–3 protein anchors and 2 veggie sides every Sunday
- ☐ Use Functional Tags to build meals based on daily goals
- ☐ Store meals in labeled containers for grab-and-go execution
- ☐ Access guides via secure token or print layout

Recipe 6: Ground Lamb + Beet Mash Bowl

Biological Rationale: Lamb delivers zinc and healthy fats for testosterone and recovery. Beets support nitric oxide production and blood flow for endurance and cognitive clarity.

Ingredients:

- 100g ground lamb
- ½ cup beet mash (roasted beets + olive oil + sea salt)
- 1 tsp olive oil

- Sea salt, cumin

Instructions:

1. Roast beets at 400°F for 25 minutes, then mash with olive oil and salt.
2. Brown lamb in skillet with olive oil and cumin.
3. Plate together and serve warm or chilled.

Macros:

- Protein: 26g
- Fat: 22g
- Carbs: 10g

Functional Tag: Hormonal Support / Recovery / Endurance

Recipe 7: Sardines + Spinach Scramble

Biological Rationale: Sardines offer omega-3s and calcium for inflammation control and brain repair. Spinach provides magnesium and fiber for gut-brain axis and neurotransmitter synthesis.

Ingredients:

- ½ can sardines in olive oil
- 2 whole eggs
- 1 cup chopped spinach
- Sea salt, turmeric

Instructions:

1. Sauté spinach until wilted.
2. Add sardines and eggs, scramble gently.
3. Season and serve warm.

Macros:

- Protein: 26g
- Fat: 20g
- Carbs: 2g

Functional Tag: Cognitive Support / Anti-inflammatory / Gut Health

Recipe 8: Collagen Yogurt + Walnut Bowl

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Walnuts add omega-3s and magnesium for hormonal balance and inflammation control. Yogurt supports microbiome diversity.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 scoop collagen peptides (10g protein)
- 1 tbsp chopped walnuts

- ¼ tsp cinnamon

Instructions:

1. Stir collagen into yogurt until smooth.
2. Top with walnuts and cinnamon.
3. Serve chilled.

Macros:

- Protein: 20g
- Fat: 16g
- Carbs: 6g

Functional Tag: Sleep / Hormonal Support / Gut Health

Recipe 9: Turkey + Kale Recovery Bowl

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Kale adds magnesium, vitamin K, and fiber for gut lining support and inflammation control.

Ingredients:

- 100g ground turkey
- 1 cup chopped kale
- 1 tsp olive oil
- Sea salt, garlic powder

Instructions:

1. Sauté kale in olive oil until wilted.
2. Add turkey and cook until browned.
3. Season and serve warm.

Macros:

- Protein: 26g
- Fat: 14g
- Carbs: 3g

Functional Tag: Recovery / Sleep / Gut Health

Recipe 10: Yogurt + Pumpkin Seed Bowl

Biological Rationale: Pumpkin seeds provide zinc and magnesium for hormonal resilience. Yogurt adds probiotics and protein for gut-brain signaling and digestive support.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp pumpkin seeds
- ¼ tsp cinnamon

- Optional: 1 tsp honey

Instructions:

1. Scoop yogurt into bowl.
2. Top with pumpkin seeds and cinnamon.
3. Add honey if desired. Serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 6g

Functional Tag: Hormonal Support / Gut Health / Satiety

Recipe 11: Bison + Cauliflower Rice Bowl

Biological Rationale: Bison provides creatine, iron, and lean protein for strength and recovery. Cauliflower rice adds fiber and volume without glucose impact, supporting gut health and satiety.

Ingredients:

- 120g ground bison
- 1 cup cauliflower rice
- 1 tsp olive oil
- Sea salt, garlic powder

Instructions:

1. Sauté cauliflower rice in olive oil until soft.
2. Add ground bison and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 28g
- Fat: 20g
- Carbs: 4g

Functional Tag: Strength / Gut Health / Satiety

Recipe 12: Yogurt + Hemp Seed Bowl

Biological Rationale: Hemp seeds offer complete plant protein and omega-3s. Yogurt provides probiotics and protein for gut-brain signaling and digestive resilience.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp hemp seeds
- ¼ tsp cinnamon

- Optional: 1 tsp honey

Instructions:

1. Stir hemp seeds and cinnamon into yogurt.
2. Add honey if desired.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 5g

Functional Tag: Gut Health / Omega-3 / Satiety

Recipe 13: Turkey + Zucchini Bake

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Zucchini adds hydration and fiber for digestive support and inflammation control.

Ingredients (makes 4 servings):

- 300g ground turkey
- 1 cup chopped zucchini
- 4 whole eggs
- Sea salt, garlic powder
- 1 tsp olive oil (for greasing)

Instructions:

1. Preheat oven to 375°F.
2. Mix turkey, zucchini, eggs, and seasonings.
3. Pour into greased baking dish.
4. Bake for 25–30 minutes until set. Cool and slice.

Macros (per serving):

- Protein: 28g
- Fat: 16g
- Carbs: 3g

Functional Tag: Sleep / Gut Health / Batch Prep

Recipe 14: Cocoa Collagen Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Cocoa adds polyphenols and mood-enhancing compounds. Almond milk supports blood sugar control.

Ingredients:

- 1 scoop collagen peptides (10g protein)

- 1 tbsp cocoa powder
- ½ cup almond milk
- Ice cubes
- Optional: cinnamon

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled as an evening or recovery shake.

Macros:

- Protein: 10g
- Fat: 6g
- Carbs: 3g

Functional Tag: Sleep / Cognitive Support / Recovery

Recipe 15: Yogurt + Flaxseed Bowl

Biological Rationale: Flaxseed provides lignans and fiber for hormonal balance and digestive ease. Yogurt adds probiotics and protein for microbiome support.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- ¼ tsp cinnamon
- Optional: 1 tsp honey

Instructions:

1. Stir flaxseed and cinnamon into yogurt.
2. Add honey if desired.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 10g
- Carbs: 5g

Functional Tag: Hormonal Support / Gut Health / Satiety

Recipe 16: Ground Beef + Sweet Potato Bowl

Biological Rationale: Beef provides iron, creatine, and saturated fat for strength and testosterone support. Sweet potato offers slow-digesting carbs and potassium for glycogen replenishment and neurotransmitter synthesis.

Ingredients:

- 120g ground beef
- ½ cup diced sweet potato
- 1 tsp olive oil
- Sea salt, paprika

Instructions:

1. Sauté sweet potato in olive oil until golden.
2. Add ground beef and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 20g
- Carbs: 16g

Functional Tag: Strength / Hormonal Support / Recovery

Recipe 17: Yogurt + Chia + Berry Bowl

Biological Rationale: Chia seeds provide omega-3s and fiber for microbiome diversity. Berries offer polyphenols for gut-brain signaling. Yogurt adds probiotics and protein for digestive resilience.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp chia seeds
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir chia into yogurt.
2. Top with berries and cinnamon.
3. Chill for 10+ minutes before serving.

Macros:

- Protein: 18g
- Fat: 10g
- Carbs: 8g

Functional Tag: Gut Health / Microbiome / Satiety

Recipe 18: Turkey + Spinach Bake

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Spinach adds magnesium and fiber for gut lining support and inflammation control.

Ingredients (makes 4 servings):

- 300g ground turkey
- 1 cup chopped spinach
- 4 whole eggs
- Sea salt, thyme
- 1 tsp olive oil (for greasing)

Instructions:

1. Preheat oven to 375°F.
2. Mix turkey, spinach, eggs, salt, and thyme.
3. Pour into greased baking dish.
4. Bake for 25–30 minutes until set. Cool and slice.

Macros (per serving):

- Protein: 28g
- Fat: 16g
- Carbs: 2g

Functional Tag: Sleep / Recovery / Gut Health

Recipe 19: Chocolate Collagen Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Cocoa adds polyphenols and mood-enhancing compounds. Almond milk supports blood sugar control.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tbsp cocoa powder
- ½ cup almond milk
- Ice cubes
- Optional: cinnamon

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled as an evening or recovery shake.

Macros:

- Protein: 10g
- Fat: 6g
- Carbs: 3g

Functional Tag: Sleep / Cognitive Support / Recovery

Recipe 20: Yogurt + Almond Butter Bowl

Biological Rationale: Almond butter provides magnesium and healthy fats for hormonal balance and satiety. Yogurt adds probiotics and protein for gut-brain axis support.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp almond butter
- ¼ tsp cinnamon
- Optional: 1 tsp chia seeds

Instructions:

1. Stir almond butter and cinnamon into yogurt.
2. Add chia seeds if desired.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 14g
- Carbs: 6g

Functional Tag: Hormonal Support / Gut Health / Satiety

Recipe 21: Ground Lamb + Zucchini Skillet

Biological Rationale: Lamb provides zinc and healthy fats for testosterone and recovery. Zucchini adds hydration and fiber for digestive ease and inflammation control.

Ingredients:

- 120g ground lamb
- 1 cup chopped zucchini
- 1 tsp olive oil
- Sea salt, cumin

Instructions:

1. Sauté zucchini in olive oil until soft.
2. Add ground lamb and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 22g
- Carbs: 4g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 22: Yogurt + Cocoa + Chia Bowl

Biological Rationale: Cocoa provides polyphenols for mood and cognition. Chia seeds offer omega-3s and fiber for microbiome diversity. Yogurt adds probiotics and protein for gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp chia seeds
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir cocoa and chia into yogurt.
2. Add cinnamon and chill for 10+ minutes.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 10g
- Carbs: 6g

Functional Tag: Cognitive Support / Gut Health / Satiety

Recipe 23: Turkey + Cauliflower Rice Bowl

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Cauliflower rice adds fiber and volume for digestive support and blood sugar control.

Ingredients:

- 120g ground turkey
- 1 cup cauliflower rice
- 1 tsp olive oil
- Sea salt, garlic powder

Instructions:

1. Sauté cauliflower rice in olive oil until soft.
2. Add turkey and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 14g
- Carbs: 4g

Functional Tag: Sleep / Gut Health / Satiety

Recipe 24: Collagen + Berry Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Berries offer polyphenols for gut-brain signaling and inflammation control. Almond milk supports blood sugar stability.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- ¼ cup mixed berries
- ½ cup almond milk
- Ice cubes
- Optional: cinnamon

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 10g
- Fat: 6g
- Carbs: 6g

Functional Tag: Sleep / Recovery / Gut-Brain Axis

Recipe 25: Yogurt + Flax + Berry Bowl

Biological Rationale: Flaxseed provides lignans and fiber for hormonal balance. Berries offer polyphenols for inflammation control. Yogurt adds probiotics and protein for microbiome support.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed into yogurt.
2. Top with berries and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 10g
- Carbs: 8g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 26: Ground Beef + Cauliflower Rice Bowl

Biological Rationale: Beef provides iron, creatine, and saturated fat for strength and testosterone support. Cauliflower rice adds fiber and volume for digestive ease and blood sugar control.

Ingredients:

- 120g ground beef
- 1 cup cauliflower rice
- 1 tsp olive oil
- Sea salt, garlic powder

Instructions:

1. Sauté cauliflower rice in olive oil until soft.
2. Add ground beef and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 20g
- Carbs: 4g

Functional Tag: Strength / Hormonal Support / Gut Health

Recipe 27: Yogurt + Cocoa + Walnut Bowl

Biological Rationale: Cocoa provides polyphenols for mood and cognition. Walnuts offer omega-3s and magnesium for hormonal balance. Yogurt adds probiotics and protein for gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp cocoa powder
- 1 tbsp chopped walnuts
- ¼ tsp cinnamon

Instructions:

1. Stir cocoa into yogurt.
2. Top with walnuts and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 16g
- Carbs: 6g

Functional Tag: Cognitive Support / Hormonal Support / Gut Health

Recipe 28: Turkey + Beet Mash Bowl

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Beets support nitric oxide production and blood flow for endurance and cognitive clarity.

Ingredients:

- 120g ground turkey
- ½ cup beet mash (roasted beets + olive oil + sea salt)
- 1 tsp olive oil
- Sea salt, thyme

Instructions:

1. Roast beets at 400°F for 25 minutes, then mash with olive oil and salt.
2. Brown turkey in skillet with olive oil and thyme.
3. Plate together and serve warm.

Macros:

- Protein: 26g
- Fat: 14g
- Carbs: 10g

Functional Tag: Sleep / Recovery / Endurance

Recipe 29: Collagen + Cinnamon Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Cinnamon enhances insulin sensitivity and blood sugar control. Almond milk supports metabolic rhythm.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- ½ tsp cinnamon
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled as an evening or recovery shake.

Macros:

- Protein: 10g
- Fat: 6g
- Carbs: 2g

Functional Tag: Sleep / Recovery / Blood Sugar Control

Recipe 30: Yogurt + Pumpkin Seed + Berry Bowl

Biological Rationale: Pumpkin seeds provide zinc and magnesium for hormonal resilience. Berries offer polyphenols for inflammation control. Yogurt adds probiotics and protein for microbiome support.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp pumpkin seeds
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Scoop yogurt into bowl.
2. Top with pumpkin seeds, berries, and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 8g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 31: Ground Bison + Zucchini Skillet

Biological Rationale: Bison provides creatine, iron, and lean protein for strength and testosterone support. Zucchini adds hydration and fiber for digestive ease and inflammation control.

Ingredients:

- 120g ground bison
- 1 cup chopped zucchini
- 1 tsp olive oil
- Sea salt, paprika

Instructions:

1. Sauté zucchini in olive oil until soft.
2. Add ground bison and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 28g
- Fat: 20g
- Carbs: 4g

Functional Tag: Strength / Hormonal Support / Gut Health

Recipe 32: Yogurt + Almond Butter + Berry Bowl

Biological Rationale: Almond butter provides magnesium and healthy fats for hormonal balance. Berries offer polyphenols for inflammation control. Yogurt adds probiotics and protein for gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp almond butter
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir almond butter into yogurt.
2. Top with berries and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 14g
- Carbs: 8g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 33: Turkey + Spinach Scramble

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Spinach adds magnesium and fiber for gut lining support and inflammation control.

Ingredients:

- 2 whole eggs
- 100g ground turkey
- 1 cup chopped spinach
- Sea salt, turmeric

Instructions:

1. Sauté spinach until wilted.
2. Add turkey and eggs, scramble gently.
3. Season and serve warm.

Macros:

- Protein: 28g
- Fat: 18g
- Carbs: 2g

Functional Tag: Sleep / Recovery / Gut Health

Recipe 34: Cocoa + Collagen + Walnut Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Cocoa adds polyphenols for mood and cognition. Walnuts offer omega-3s and magnesium for hormonal resilience.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tbsp cocoa powder
- 1 tbsp chopped walnuts
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 10g
- Fat: 14g
- Carbs: 4g

Functional Tag: Sleep / Cognitive Support / Hormonal Support

Recipe 35: Yogurt + Flaxseed + Walnut Bowl

Biological Rationale: Flaxseed provides lignans and fiber for hormonal balance. Walnuts offer omega-3s and magnesium for inflammation control. Yogurt adds probiotics and protein for gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- 1 tbsp chopped walnuts
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed into yogurt.
2. Top with walnuts and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 16g
- Carbs: 6g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 36: Ground Lamb + Spinach Skillet

Biological Rationale: Lamb provides zinc and healthy fats for testosterone and recovery. Spinach adds magnesium and fiber for gut lining support and inflammation control.

Ingredients:

- 120g ground lamb
- 1 cup chopped spinach
- 1 tsp olive oil
- Sea salt, cumin

Instructions:

1. Sauté spinach in olive oil until wilted.
2. Add ground lamb and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 22g
- Carbs: 3g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 37: Yogurt + Hemp + Berry Bowl

Biological Rationale: Hemp seeds offer complete plant protein and omega-3s. Berries provide polyphenols for inflammation control. Yogurt adds probiotics and protein for microbiome support.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp hemp seeds
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir hemp seeds into yogurt.
2. Top with berries and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 8g

Functional Tag: Gut Health / Omega-3 / Anti-inflammatory

Recipe 38: Turkey + Kale Scramble

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Kale adds magnesium, vitamin K, and fiber for gut lining support and inflammation control.

Ingredients:

- 2 whole eggs
- 100g ground turkey
- 1 cup chopped kale
- Sea salt, garlic powder

Instructions:

1. Sauté kale until wilted.
2. Add turkey and eggs, scramble gently.
3. Season and serve warm.

Macros:

- Protein: 28g
- Fat: 18g
- Carbs: 3g

Functional Tag: Sleep / Recovery / Gut Health

Recipe 39: Collagen + Walnut + Cinnamon Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Walnuts offer omega-3s and magnesium for hormonal resilience. Cinnamon supports blood sugar control and cognitive clarity.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tbsp chopped walnuts
- ½ tsp cinnamon
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 10g
- Fat: 14g
- Carbs: 3g

Functional Tag: Sleep / Hormonal Support / Cognitive Support

Recipe 40: Yogurt + Flax + Cocoa Bowl

Biological Rationale: Flaxseed provides lignans and fiber for hormonal balance. Cocoa adds polyphenols for mood and cognition. Yogurt supports microbiome diversity and gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed and cocoa into yogurt.
2. Add cinnamon and serve chilled.

Macros:

- Protein: 18g
- Fat: 10g
- Carbs: 6g

Functional Tag: Hormonal Support / Cognitive Support / Gut Health

Recipe 41: Ground Beef + Kale Skillet

Biological Rationale: Beef provides iron and creatine for strength and testosterone support. Kale adds magnesium, vitamin K, and fiber for gut lining support and inflammation control.

Ingredients:

- 120g ground beef
- 1 cup chopped kale
- 1 tsp olive oil
- Sea salt, garlic powder

Instructions:

1. Sauté kale in olive oil until wilted.
2. Add ground beef and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 20g
- Carbs: 3g

Functional Tag: Strength / Hormonal Support / Gut Health

Recipe 42: Yogurt + Chia + Cocoa Bowl

Biological Rationale: Chia seeds offer omega-3s and fiber for microbiome diversity. Cocoa provides polyphenols for mood and cognition. Yogurt adds probiotics and protein for gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp chia seeds
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir chia and cocoa into yogurt.
2. Add cinnamon and serve chilled.

Macros:

- Protein: 18g
- Fat: 10g
- Carbs: 6g

Functional Tag: Gut Health / Cognitive Support / Satiety

Recipe 43: Turkey + Zucchini Scramble

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Zucchini adds hydration and fiber for digestive ease and inflammation control.

Ingredients:

- 2 whole eggs
- 100g ground turkey
- 1 cup chopped zucchini
- Sea salt, thyme

Instructions:

1. Sauté zucchini until soft.
2. Add turkey and eggs, scramble gently.
3. Season and serve warm.

Macros:

- Protein: 28g
- Fat: 18g
- Carbs: 3g

Functional Tag: Sleep / Recovery / Gut Health

Recipe 44: Collagen + Berry + Cinnamon Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Berries offer polyphenols for inflammation control. Cinnamon supports blood sugar regulation and cognitive clarity.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- ¼ cup mixed berries
- ½ tsp cinnamon
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 10g
- Fat: 6g
- Carbs: 6g

Functional Tag: Sleep / Cognitive Support / Recovery

Recipe 45: Yogurt + Flax + Hemp Bowl

Biological Rationale: Flaxseed and hemp provide lignans, omega-3s, and fiber for hormonal balance and inflammation control. Yogurt adds probiotics and protein for microbiome support.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- 1 tbsp hemp seeds
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed and hemp seeds into yogurt.
2. Add cinnamon and serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 6g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 46: Ground Bison + Beet Mash Bowl

Biological Rationale: Bison provides creatine and iron for strength and testosterone support. Beets support nitric oxide production and blood flow for endurance and cognitive clarity.

Ingredients:

- 120g ground bison
- ½ cup beet mash (roasted beets + olive oil + sea salt)
- 1 tsp olive oil
- Sea salt, paprika

Instructions:

1. Roast beets at 400°F for 25 minutes, then mash with olive oil and salt.
2. Brown bison in skillet with olive oil and paprika.
3. Plate together and serve warm.

Macros:

- Protein: 28g
- Fat: 20g
- Carbs: 10g

Functional Tag: Strength / Recovery / Endurance

Recipe 47: Yogurt + Chia + Walnut Bowl

Biological Rationale: Chia seeds offer omega-3s and fiber for microbiome diversity. Walnuts provide magnesium and healthy fats for hormonal balance. Yogurt adds probiotics and protein for gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp chia seeds
- 1 tbsp chopped walnuts
- ¼ tsp cinnamon

Instructions:

1. Stir chia seeds into yogurt.
2. Top with walnuts and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 16g
- Carbs: 6g

Functional Tag: Gut Health / Hormonal Support / Satiety

Recipe 48: Turkey + Cauliflower Scramble

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Cauliflower adds fiber and volume for digestive ease and blood sugar control.

Ingredients:

- 2 whole eggs
- 100g ground turkey
- 1 cup riced cauliflower
- Sea salt, garlic powder

Instructions:

1. Sauté cauliflower until soft.
2. Add turkey and eggs, scramble gently.
3. Season and serve warm.

Macros:

- Protein: 28g
- Fat: 18g
- Carbs: 4g

Functional Tag: Sleep / Recovery / Gut Health

Recipe 49: Collagen + Cocoa + Hemp Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Cocoa adds polyphenols for mood and cognition. Hemp seeds offer omega-3s and complete plant protein.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tsp cocoa powder
- 1 tbsp hemp seeds
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 12g
- Fat: 12g
- Carbs: 4g

Functional Tag: Sleep / Cognitive Support / Omega-3

Recipe 50: Yogurt + Flax + Berry + Cocoa Bowl

Biological Rationale: Flaxseed provides lignans and fiber for hormonal balance. Berries offer polyphenols for inflammation control. Cocoa supports mood and cognition. Yogurt adds probiotics and protein.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- ¼ cup mixed berries
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed and cocoa into yogurt.
2. Top with berries and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 8g

Functional Tag: Hormonal Support / Cognitive Support / Gut Health

Recipe 51: Ground Lamb + Cauliflower Rice Bowl

Biological Rationale: Lamb provides zinc and saturated fat for testosterone and recovery. Cauliflower rice adds fiber and volume for digestive ease and blood sugar control.

Ingredients:

- 120g ground lamb
- 1 cup cauliflower rice
- 1 tsp olive oil
- Sea salt, cumin

Instructions:

1. Sauté cauliflower rice in olive oil until soft.
2. Add ground lamb and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 22g
- Carbs: 4g

Functional Tag: Hormonal Support / Gut Health / Satiety

Recipe 52: Yogurt + Hemp + Cocoa Bowl

Biological Rationale: Hemp seeds offer omega-3s and complete plant protein. Cocoa provides polyphenols for mood and cognition. Yogurt adds probiotics and protein for gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp hemp seeds
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir hemp seeds and cocoa into yogurt.
2. Add cinnamon and serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 6g

Functional Tag: Cognitive Support / Omega-3 / Gut Health

Recipe 53: Turkey + Beet Mash Scramble

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Beets support nitric oxide production and blood flow for endurance and cognitive clarity.

Ingredients:

- 2 whole eggs
- 100g ground turkey
- ½ cup beet mash
- Sea salt, thyme

Instructions:

1. Roast beets and mash with olive oil and salt.
2. Sauté turkey until browned.
3. Add eggs and scramble gently. Serve with beet mash.

Macros:

- Protein: 28g
- Fat: 18g
- Carbs: 10g

Functional Tag: Sleep / Recovery / Endurance

Recipe 54: Collagen + Walnut + Berry Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Walnuts offer omega-3s and magnesium for hormonal resilience. Berries add polyphenols for gut-brain signaling.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tbsp chopped walnuts
- ¼ cup mixed berries
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 10g
- Fat: 14g
- Carbs: 6g

Functional Tag: Sleep / Hormonal Support / Cognitive Support

Recipe 55: Yogurt + Flax + Hemp + Berry Bowl

Biological Rationale: Flaxseed and hemp provide lignans, omega-3s, and fiber for hormonal balance and inflammation control. Berries offer polyphenols. Yogurt adds probiotics and protein.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- 1 tbsp hemp seeds
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed and hemp seeds into yogurt.
2. Top with berries and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 14g
- Carbs: 8g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 56: Ground Bison + Kale Skillet

Biological Rationale: Bison provides creatine and iron for strength and testosterone support. Kale adds magnesium and fiber for gut lining support and inflammation control.

Ingredients:

- 120g ground bison
- 1 cup chopped kale
- 1 tsp olive oil
- Sea salt, garlic powder

Instructions:

1. Sauté kale in olive oil until wilted.
2. Add ground bison and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 28g
- Fat: 20g
- Carbs: 3g

Functional Tag: Strength / Hormonal Support / Gut Health

Recipe 57: Yogurt + Flax + Hemp + Cocoa Bowl

Biological Rationale: Flaxseed and hemp provide lignans, omega-3s, and fiber for hormonal balance. Cocoa adds polyphenols for mood and cognition. Yogurt supports microbiome diversity.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- 1 tbsp hemp seeds
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed, hemp seeds, and cocoa into yogurt.
2. Add cinnamon and serve chilled.

Macros:

- Protein: 18g
- Fat: 14g
- Carbs: 6g

Functional Tag: Hormonal Support / Cognitive Support / Gut Health

Recipe 58: Turkey + Zucchini Scramble

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Zucchini adds hydration and fiber for digestive ease and inflammation control.

Ingredients:

- 2 whole eggs
- 100g ground turkey
- 1 cup chopped zucchini
- Sea salt, thyme

Instructions:

1. Sauté zucchini until soft.
2. Add turkey and eggs, scramble gently.
3. Season and serve warm.

Macros:

- Protein: 28g
- Fat: 18g
- Carbs: 3g

Functional Tag: Sleep / Recovery / Gut Health

Recipe 59: Collagen + Hemp + Cinnamon Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Hemp seeds offer omega-3s and complete plant protein. Cinnamon supports blood sugar control and cognitive clarity.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tbsp hemp seeds
- ½ tsp cinnamon
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 12g
- Fat: 12g
- Carbs: 3g

Functional Tag: Sleep / Cognitive Support / Omega-3

Recipe 60: Yogurt + Chia + Cocoa + Berry Bowl

Biological Rationale: Chia seeds offer omega-3s and fiber for microbiome diversity. Cocoa provides polyphenols for mood and cognition. Berries add antioxidants. Yogurt supports gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp chia seeds
- 1 tsp cocoa powder
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir chia and cocoa into yogurt.
2. Top with berries and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 10g
- Carbs: 8g

Functional Tag: Gut Health / Cognitive Support / Anti-inflammatory

Recipe 61: Ground Lamb + Kale Skillet

Biological Rationale: Lamb provides zinc and saturated fat for testosterone and recovery. Kale adds magnesium, vitamin K, and fiber for gut lining support and inflammation control.

Ingredients:

- 120g ground lamb
- 1 cup chopped kale
- 1 tsp olive oil
- Sea salt, cumin

Instructions:

1. Sauté kale in olive oil until wilted.
2. Add ground lamb and cook until browned.
3. Season and serve warm or store for batch prep.

Macros:

- Protein: 26g
- Fat: 22g
- Carbs: 3g

Functional Tag: Hormonal Support / Gut Health / Anti-inflammatory

Recipe 62: Yogurt + Flax + Walnut + Cocoa Bowl

Biological Rationale: Flaxseed and walnuts provide lignans, omega-3s, and magnesium for hormonal balance and inflammation control. Cocoa adds polyphenols for mood and cognition. Yogurt supports microbiome diversity.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- 1 tbsp chopped walnuts
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir flaxseed and cocoa into yogurt.
2. Top with walnuts and cinnamon.
3. Serve chilled.

Macros:

Recipe 84: Collagen + Cocoa + Walnut + Berry Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Cocoa adds polyphenols for mood and cognition. Walnuts and berries support hormonal resilience and gut-brain signaling.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tsp cocoa powder
- 1 tbsp chopped walnuts
- ¼ cup mixed berries
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 10g
- Fat: 14g
- Carbs: 6g

Recipe 85: Yogurt + Chia + Flax + Cocoa + Berry Bowl

Biological Rationale: Chia and flax provide omega-3s and fiber for hormonal balance. Cocoa adds polyphenols for cognition. Berries support inflammation control. Yogurt enhances microbiome diversity.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp chia seeds
- 1 tsp ground flaxseed
- 1 tsp cocoa powder
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir chia, flax, and cocoa into yogurt.
2. Top with berries and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 12g
- Carbs: 8g

Recipe 86: Ground Bison + Zucchini + Kale Skillet

Biological Rationale: Bison provides creatine and iron for strength and testosterone support. Zucchini and kale add hydration, fiber, and magnesium for gut lining support and inflammation control.

Ingredients:

- 120g ground bison
- ½ cup chopped zucchini
- ½ cup chopped kale
- 1 tsp olive oil
- Sea salt, garlic powder

Instructions:

1. Sauté zucchini and kale in olive oil until soft.
2. Add ground bison and cook until browned.
3. Season and serve warm.

Macros:

- Protein: 28g
- Fat: 20g

- Carbs: 4g

Recipe 87: Yogurt + Chia + Flax + Walnut + Cocoa Bowl

Biological Rationale: Chia and flax provide omega-3s and fiber for hormonal balance. Walnuts offer magnesium and healthy fats. Cocoa supports mood and cognition. Yogurt enhances microbiome diversity.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tbsp chia seeds
- 1 tsp ground flaxseed
- 1 tbsp chopped walnuts
- 1 tsp cocoa powder
- ¼ tsp cinnamon

Instructions:

1. Stir chia, flax, and cocoa into yogurt.
2. Top with walnuts and cinnamon.
3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 16g
- Carbs: 6g

Recipe 88: Turkey + Beet + Spinach Scramble

Biological Rationale: Turkey provides lean protein and tryptophan for sleep and recovery. Beets support nitric oxide production. Spinach adds magnesium and fiber for gut lining support.

Ingredients:

- 2 whole eggs
- 100g ground turkey
- ¼ cup beet mash
- ½ cup chopped spinach
- Sea salt, thyme

Instructions:

1. Sauté spinach until wilted.
2. Add turkey and eggs, scramble gently.
3. Serve with beet mash on the side.

Macros:

- Protein: 28g
- Fat: 18g
- Carbs: 6g

 Recipe 89: Collagen + Hemp + Walnut + Cinnamon Shake

Biological Rationale: Collagen provides glycine for sleep and tissue repair. Hemp and walnuts offer omega-3s and magnesium for hormonal resilience. Cinnamon supports blood sugar control and cognition.

Ingredients:

- 1 scoop collagen peptides (10g protein)
- 1 tbsp hemp seeds
- 1 tbsp chopped walnuts
- ½ tsp cinnamon
- ½ cup almond milk
- Ice cubes

Instructions:

1. Blend all ingredients until smooth.
2. Serve chilled.

Macros:

- Protein: 12g
- Fat: 16g
- Carbs: 4g

Functional Tag: Sleep / Hormonal Support / Cognitive Support

 Recipe 90: Yogurt + Flax + Hemp + Cocoa + Berry Bowl

Biological Rationale: Flax and hemp provide lignans, omega-3s, and fiber for hormonal balance. Cocoa supports mood and cognition. Berries offer polyphenols. Yogurt enhances gut-brain signaling.

Ingredients:

- ½ cup full-fat Greek yogurt
- 1 tsp ground flaxseed
- 1 tbsp hemp seeds
- 1 tsp cocoa powder
- ¼ cup mixed berries
- ¼ tsp cinnamon

Instructions:

1. Stir flax, hemp, and cocoa into yogurt.

2. Top with berries and cinnamon.

3. Serve chilled.

Macros:

- Protein: 18g
- Fat: 14g
- Carbs: 8g
